RhythmForge VR

Conduct reality. Compose destiny. Create music with motion.

Ballet-Inspired Motion

Every gesture flows like a dancer's movement. The stylus becomes your baton, your brush, your choreographer's tool. Graceful arcs create melodies, sweeping gestures shape rhythms, and delicate touches add harmony.

Natural Expression

No buttons. No menus. Just movement. Your body's natural rhythm translates directly into musical patterns. Draw circles for loops, waves for melodies, spirals for crescendos.

Visual Feedback

Watch your strokes bloom into glowing trails that pulse with rhythm. See sound waves ripple through 3D space. Every motion leaves a luminous path that becomes part of your composition.

The Dance of Creation

Pirouette Draw

Draw smooth circular motions in space, like a ballet pirouette. The size of your circle determines the tempo.

→ Creates looping rhythmic patterns

Arabesque Wave

Sweep the stylus in graceful arcs at different heights, mimicking the extended line of an arabesque.

→ Sculpts melodic curves with pitch control

Grand Jeté Strike

Quick, decisive thrusts through space, like a dancer's leap. Pressure determines impact.

→ Triggers percussion and accents

Port de Bras Flow

Smooth, flowing arm movements with varying pressure, inspired by graceful arm positions.

→ Controls dynamics and expression

Plié Fade

Gentle downward motions with decreasing pressure, like sinking into a plié.

→ Creates fade-outs and diminuendos

Chaîné Turns

Quick rotational flicks with the stylus, mimicking spinning turns.

→ Adds trills and ornamentations

Tendu Extension

Slow, controlled stretches from center to periphery, like extending the leg in tendu.

→ Builds crescendos and swells

Balancé Sway

Gentle side-to-side rocking motions with rhythmic timing.

→ Controls tempo and time signatures

Interactive Motion Canvas

Draw on the canvas below to experience how ballet-inspired movements create music. Click and drag to paint sound trails.

Current Mode: **Rhythm**

Design Principles

🌊 Fluidity First

- No hard edges or abrupt transitions
- Smooth interpolation between movements
- Continuous feedback loops
- Natural motion curves

💫 Pressure Dynamics

- 4096 levels of pressure sensitivity
- Soft touch = pianissimo (pp)
- Medium pressure = mezzo-forte (mf)
- Hard press = fortissimo (ff)

🎨 Visual Choreography

- Trails that glow and fade organically
- Particle effects follow motion paths
- Color-coded gesture types
- 3D spatial visualization

⚡ Real-Time Response

- Sub-20ms latency
- Immediate audio feedback
- Visual-audio synchronization
- No perceived delay

🌀 Spatial Awareness

- Height = pitch (higher = higher notes)
- Distance = volume (closer = louder)
- Left/right = stereo panning
- Depth = reverb intensity

🎭 Expressive Freedom

- No wrong movements
- Pentatonic scale defaults
- AI-assisted harmony
- Beginner-friendly, pro-powerful

© 2026 RhythmForge VR - Where Music Meets Motion

"In ballet, you learn to move through space with intention. In RhythmForge, that intention becomes music."
